"I really liked the conference and I would like to come back again because it was interesting and fun."

“Overall it was a fun experience and I will consider a STEM career more seriously.”

- TRLT participants

Taking the Road Less Traveled provides girls in grades 8-10 the chance to learn about opportunities available in Science, Technology, Engineering and Math fields by interacting with professionals and engaging in experiential activities. Participants spend the day on the Iowa State University campus and have the chance to meet current ISU students pursuing STEM degrees.

Conference Goals:
- Promote interest in Science, Technology, Engineering & Math
- Increase confidence in pursuing STEM fields
- Expand awareness of STEM careers
- Reinforce importance of science and math courses
