ABOUT WISE STUDENTS GET INVOLVED K-12 OUTREACH PARTNERS

student role model program

About the Student Role Model Program

Student Role Models are current undergraduate STEM students at Iowa State University employed by the Program for Women in Science and Engineering (WiSE). Role Models visit classrooms and other academic settings across Iowa to provide hands-on STEM activities for K-12 youth. Role Models encourage an interest in STEM fields and share their college and STEM experiences. **Currently, the Student Role Model Program is hosting visits virtually with youth being together in a classroom or tuning in at home.**

Activity Database

Activities range from designing a protective bungee cord for an egg to building and observing a biome. We have over 60 activities ranging in subjects from biology, physics, and chemistry, to astrology, animal science, engineering, and more. Visit the [database](#) to explore the activities by subjects and grade levels.

Request a Role Model Visit

Visits are primarily scheduled during the Iowa State academic year; however, limited visits may be possible during breaks or summer months. There is no fee for the requesting school or organization, but we do request that educators complete a short evaluation of their experience. When requesting visits, it is **important to note** that our Student Role Model Program is dependent on undergraduate students' class schedule.

Home > **Hoop Gliders** 

Activities > *Summary: Students will understand and can explain the four forces of flight that allow airplanes to fly*

Requests > Students will create a simple glider out of materials that flies amazingly well! After observing its flight, they will be able to discuss why air resistance and drag make it possible for this design to glide.

Account >

Step 7: Fill out the Request Activity form with the information about the event. This includes: your contact information, address for the **event location**, date of the event, start time, duration, grade level and number of students. We aim to have a ratio of 2:25, Student Role Model to youth. If you have a larger group, we suggest selecting two different activities for a rotation. This program hinges on the schedule of our full-time student employees. Any flexibility you can indicate will be helpful.

Note: For scheduling purposes, we ask that requests are submitted a minimum of two weeks prior to your desired date.

Step 8: Once the form is completed, you will be brought to the Request Queue page. Here you can schedule additional visits, review your visit, or do a final submission.

To continue to add more visits, click on the “Add More Activities” button and repeat steps 5-7. If you are finished filling out requests, you need to click the “Submit Request(s)” button to formally submit the request.

The Request has been updated successfully.

After you have selected the activity or activities for your classroom or group, click on "Submit Request(s)".

In order to finalize your request, you will be asked to fill out final visit details on the next page.

Activity	Contact	Requested Date ▲	Actions
Hoop Gliders	<input type="text"/>	Fri 23 Apr 2021, 2:30 PM	<input type="button" value="View"/> <input type="button" value="Edit"/> <input type="button" value="Remove"/>

Step 9: Fill out the remaining information and click the “Final Submit” button. An email will be sent to your email account with the request information summary. The Student Role Model Coordinator will be in contact with you at least two weeks prior to your visit.
